# Pieredzes stāsts

· **Vārds, uzvārds – Ana Živković**

· **Nosūtošā augstskola - J.J. Strosmaijera Osijekas Universitāte Horvātijā**

· **Mobilitātes valsts (klātienes pasākumiem) – Latvija, Horvātija**

· **Uzņemošā partneraugstskola projekta ietvaros – Alberta koledža**

· **Aktivitāte – apmācības, pieredzes apmaiņa, publicitātes nodrošināšana, projekta koordinēšana**

· **Dalības projektā ilgums - no 01.01.2025. līdz 30.06.2026.**

**Projekta numurs:** 2024-2-LV01-KA210-VET-000280127

**Pieredzes apraksts un ieteikumi citiem dalībniekiem:**

My participation in the project was valuable because it combined practical digital skills development with research on the skills gap in higher education. One of the main findings was the clear gap between what employers expect and what higher education institutions currently offer, especially in relation to digital mindset, adaptability, curiosity, self-learning, and data literacy. The project also produced useful outputs, including updated study content, methodological materials, and examples of how digital and AI tools can be integrated into teaching.

The most valuable parts for me were the expert discussions, and the exchange of experience with colleagues from partner institutions. International cooperation was particularly useful because it allowed us to compare approaches and identify solutions that are relevant across different higher education contexts. For my institution, the project highlighted the need to update curricula more consistently so that students develop not only technical skills, but also the ability to interpret data and work in changing digital environments.

In the future, I plan to use the project results in curriculum development, course improvement, and discussions about broader changes in study programmes. The findings will be especially useful for aligning teaching with labour market needs and for supporting staff and students in building more relevant digital competencies.
